

Reecha Thapaliya

Computer Engineering Student

reechathapaliya7@gmail.com 9765547826 Kathmandu,Nepal

github.com/reechathapaliya1221

Summary

Computer Engineering student with a strong foundation in Python development, database management systems (DBMS), and user-centric design. Built practical solutions including a game development project, a functional DBMS software, and an automated exam seat assignment system. Passionate about creating efficient, well-designed applications that solve real-world problems. Seeking an internship where I can leverage programming, database design, and problem-solving skills to contribute to impactful projects.

Education

2024 – Present **Bachelor of Engineering in Computer Engineering**
Sagarmatha Engineering College

2021 – 2023 **Higher Secondary Education (+2) – Computer Science**
National School of Sciences

Skills

Languages
Python, PHP, JavaScript, SQL

Web Development
React.js, HTML, CSS, Bootstrap, Flask

Database
MySQL, DBMS, Query Optimization

Projects

08/2025 – 10/2025 **Bus Reservation System**
Developed a full-stack bus ticketing system using **PHP**, **MySQL**, **HTML**, **CSS**, and **JavaScript**

01/2025 – 02/2025 **Game Development in Unity**
- Implemented core mechanics including player movement, collision detection, and scoring systems using Unity's physics engine.

01/2026 – 02/2026 **Weather Indication using Python**
Built a Python application that fetches real-time weather data using OpenWeatherMap API

05/2026 – Present **SA Driven -Exam Seat Assignment**
- Implemented **Simulated Annealing** metaheuristic to solve the NP-hard exam seat assignment problem.

Interests

- Algorithm Design & Optimization
- Database Design & Management
- Full-Stack Web Development
- API Integration & Data Visualization
- Game Development
